To Our Valued Customers

Re: Probable Interruptions in Service

Dear Friends:

Starting on the 8<sup>th</sup> of December, we will begin our long needed Capital Improvement Program (CIP). Our first project will be replacing a main distribution line valve at the intersection of Roundup Way and Sagebrush Street. Our second project for the month will be installing earthquake proof connectors to both of our Sagebrush Street tanks. This work will also be completed on a main distribution line.

During this construction there is a pretty good chance that there will be numerous short interruptions in your water service. You have our word that these interruptions will not only be short, but over as quickly as humanly possible. I would encourage you to visit our website at [www.marianaranchoscwd.org](http://www.marianaranchoscwd.org) for the most current and up to date information. Please click on the "Important Announcements" and "News and Events" sections.

In preparation for times like these we would like to suggest that you keep water in your refrigerator for drinking purposes, and perhaps a small bucket or 5 gallon pail for any other water uses you may have during the outages.

We do not anticipate any interruptions; however there is always the possibility of unforeseen issues that usually arise. We would like to apologize in advance for any inconvenience this may cause you and/or your family.

If you have any questions or special needs during this time, please contact the office or myself immediately.

Sincerely,

James Hansen  
General Manager
